

St John Baptist De La Salle Catholic School, Addis  
Ababa

Grade 11 Physics Homework 1  
1<sup>st</sup> Quarter

November, 2023

1. Using any programming language of your choice (Javascript, Matlab, Python, Java, or even C), write a short program that can do either of the following
  - Intake the components of vectors that would be added or multiplied and present the resultant.
  - You can also make a program that visually adds vectors together.
  - Or be creative with whatever you want!
